

Fact Sheet

Traveler SD

Computer backup built into a SD Card

Announcement Date (embargo to): Jan 6, 2010

Shipping: April, 2010

Price: \$TBD

Available at: www.clickfree.com

Product Description

The Clickfree Traveler SD is a SD memory card with pre-installed Clickfree backup software that enables computer backup using your computer's SD slot.

The Traveler SD has plenty of capacity to backup office files from any PC or Mac. Perfect for the business traveler, automatic computer backup onto your Clickfree SD card is a secure and convenient way to ensure you have a second copy of critical presentations, documents, or other office files. The Traveler SD comes in 16GB and 32GB capacities – with larger capacities to be announced in the coming year.

Just install the Clickfree Traveler SD card into the SD slot in your computer, and the Clickfree backup software will automatically backup new or changed office files on your computer. Clickfree's smart backup will automatically find, organize, and store hundreds of file types. Options allow you to configure the backup, controlling what will be included or excluded. It's a fast, efficient, and easy way to backup critical files and a convenient way to transfer them easily between computers with SD slots.

Key Features

- **Clickfree Award-Winning Smart Backup Technology** automatically backs up and organizes hundreds of file types, and makes it easy to restore or transfer files to new computers, even when upgrading Windows operating systems.
- **Encryption** – secure your backup using password protection with encryption
- **Multi-PC** – backup multiple computers, Mac or PC, onto one SD Card
- **Control** backup settings in "Options"
