Product Description

The Clickfree Traveler for Blackberry is a micro-SD card with pre-installed Clickfree backup software that enables computer backup to your Blackberry smart phone.

The Traveler for Blackberry has plenty of capacity to backup Office files from any PC or Mac. Perfect for the business traveler, enabling computer backup on your Blackberry adds a level of comfort – you'll feel better knowing that you can quickly create secure backups and transfer or recover important presentations and documents conveniently using the Blackberry, a device that you carry with you all the time. The Traveler for Blackberry comes in 16GB capacity – with larger capacities to be announced in the coming year.

Just install the Clickfree Traveler micro-SD card into your Blackberry, then whenever you connect your Blackberry to your computer using its USB cable, the Clickfree backup software will automatically backup new or changed office files from your computer onto the connected Blackberry. Clickfree's smart backup will automatically find, organize, and store hundreds of file types. Options allow you to configure the backup, controlling what will be included or excluded. It's a fast, efficient, and easy way to backup critical files while you're on the go.

Key Features

- **Clickfree Award-Winning Smart Backup Technology** automatically backs up and organizes hundreds of file types, and makes it easy to restore or transfer files to new computers, even when upgrading Windows operating systems.
- **Encryption** – secure your backup using password protection with encryption
- **Multi-PC** – backup multiple computers, Mac or PC, onto one Blackberry
- **Control** backup settings in "Options"
